

Ryo Sato received the M.S degree and Ph.D degree in the Department of Finemechanics, Tohoku University, Japan, in 2021 and 2023, respectively. He received a research fellowship (DC1) of the Japan Society for the Promotion of Science when he is Ph. D candidate. He is currently an assistant professor in the Department of Finemechanics, Tohoku University. In addition, his current work interests include precision nanometrology, optical sensors, and nonlinear optical phenomena and production engineering. In connection with these studies, he also reviewed about “Advanced Sensing and Machine Learning Technologies for Intelligent Measurement in Smart and Precision Manufacturing” in *Int. J. Automation Technol.*, 18(4), pp. 545-580, 2024.
