

Wijayanti Dwi Astuti is an Assistant Professor in the Instrumentation and Control Engineering Technology Study Program at the Department of Electrical Engineering and Informatics, Vocational College, Universitas Gadjah Mada, Indonesia. She earned her Ph.D. from Tohoku University, Japan, where she conducted research in precision metrology, specifically in the field of angle measurement. Currently, she continues her research in Indonesia, focusing on metrology and control engineering. She is strongly committed to advancing scientific knowledge through ongoing research projects and publications and is actively involved in mentoring students and collaborating on various national and international research initiatives.
